Features and Specifications

Side Chairs and Lounge Chairs
Collaborate chairs have a steel frame and panels made from 100% recycled material (60% post consumer and 40% post industrial). The panels are covered with foam and upholstered. The seat and back can be upholstered in two different surfaces. Fabric will be single stitched, and leather will be double stitched. The base, which is available in three shapes, features a 180 degree self-returning swivel.

Additional Notes

Textile crispness will be influenced by the amount of stretch in each textile. Some textiles will stretch more than others, resulting in a small amount of material pooling. This can be addressed by running a hand across the surface to smooth the material.

Linear fabric is not recommended for use on Collaborate seating, due to the manner in which the fabric is applied.

Collaborate tables compliment Collaborate lounge and visitor chairs.

COM yardage:	2.25 linear yards (side chairs) 2.75 linear yards (lounge chairs)
COL square footage:	40.5 square feet (side chairs) 49.5 square feet (lounge chairs)
