

Compose® Beam

Spine-Based Workspaces

The nature of work is changing at an exceedingly fast pace, producing new business challenges that affect where and how people work. Today's workspaces must be versatile, supporting collaboration and communication, as well as individual work. Compose Beam is a freestanding, light-scale, spine-based system solution that provides the versatility and functionality people desire for today's workstyles and the ever-changing work environment.

HAWORTH®

Unique, Contemporary Workspaces

Compose Beam creates an environment where people can—and want to—do their best work. Its freestanding construction uses a beam structure and uniquely designed, independent legs to create a lighter-scale, contemporary aesthetic people are drawn to. An efficient way to optimize open plans, Compose Beam provides workspaces, essential tools, power, and connectivity to individuals, while encouraging team collaboration and communication.

Features

Utilizing the flexibility of a spine-based system, Compose Beam optimizes open plans with a variety of workstation options that cater to the diverse needs of today's workstyles, while offering a clean, contemporary design.

Light-scale beam design – Uses an 8"-high beam, providing a non-panel solution with reduced materiality and a more open feel.

Configuration flexibility – Independent, off-modular beam allows freestanding tables, fixed surfaces, and screens to be placed at any point, then added or removed as needed.

Independent legs – T-leg and A-frame leg options create an appealing, contemporary aesthetic with an even lighter-scale, open appearance.

Freestanding system – Compatible with a variety of accessories, storage, tools, and worksurfaces—including height-adjustable tables—Compose Beam functions alone or as a centerpiece for a cohesive floorplate, with complementary elements used around it as needed.

Easy power and data access – Enables people to plug into essential technology, at a convenient location along the beam, without disrupting their workflow.

Minimalistic screens – Provide a clean look and delineation of personal space yet promote interaction.

Colors, Materials, Finishes

Compose Beam uses many of the same components and visually harmonizes with both Compose® and Compose Connections™ as part of Haworth's Integrated Palette. All surface materials and finishes that can be applied to Compose and Compose Connections can be applied to Compose Beam, offering the choice to seamlessly blend into the environment or create a focal point.
