

Openest® Feather

Lounge Seating

With today's shrinking workplace footprints, organizations are pressured to do more with less space. As part of the Openest collection of products designed by Patricia Urquiola, Feather sofas help leverage under-utilized space by creating cozy, versatile work areas that people are drawn to.

HAWORTH®

Inviting and Engaging

Like the other pieces in the Openest collection, Feather invites people to work, gather, share ideas, or simply relax and refresh. Dramatic in its simplicity, the gracefully curved shape orients people toward one another.

A Collaborative Choice

With solutions that respond to the ever-evolving nature of work, Feather creates practical, versatile spaces that gently draw people together in casual, approachable settings.

Symmetrical or asymmetrical design – Choose from a sofa with a middle bend or one that features a left- or right-handed bend to allow better face-to-face communication flow.

Complementary colors – Personalize Feather with a range of colors to enhance any environment.

Optional attached table – Fixed, side-mount table can be attached on the left or right side to keep work tools and personal items close at hand; an attached, height-adjustable table is also available.

Optional hideaway power module – Specified separately, power may be installed under the sofa to provide even more working versatility.

Colors, Materials, Finishes

Carefully selected materials and colors, combined with tailored finish details, evoke the craftsmanship one might expect to find in luxury furniture. Feather is available in a variety of colored fabrics, and leather, with specifiable stitching of Accent Orange, Black, Plaster, and Rusty Red. The cast-aluminum legs are also offered in Accent Orange, Black, Plaster, and Rusty Red. The optional swivel table features your choice of clear finished wood in Plank White Oak or Walnut, or painter MDF in Black, Polar, Stormy, or Vapor.
