Planes™

Training

HAWORTH®

Planes training tables work together in dynamic applications to help ensure people stay engaged and connected with learning. Tables are easy to move and reconfigure, and power distribution solutions enable quick access for technology tools. With coordinating collaborative tables, carts, easels, and information boards, the line creates a complete learning environment.

Adapts easily

Arrange Planes training tables as needed. You can securely gang them together, then easily reconfigure them when needs change—all without tools or expertise. Flip-top models ease transport and nest for efficient storage. Hinged modesty panels can be quickly added or removed.

Full power

The modular power system provides everything you need to connect to building power and safely distribute it from table to table as needed. When reconfiguring, it's simple to disconnect and reconnect tables with no tools. For convenient tabletop access to power and data, flip-top units offer multiple outlets and lie flush when closed.

Worksurface choices

Planes training table worksurfaces are available in a variety of sizes and shapes to enable a range of configurations. Designed as part of the Haworth Integrated Palette™, Planes tables include a large selection of laminates and veneers to meet design requirements and integrate visually as well as dimensionally with other Haworth products.
