

Soft Shelter

HAWORTH®

Quick
catch-up_

_Enabled

Soft Shelter is an easily configurable solution for creating innovative breakout space.

Sometimes when you are working in a more relaxed environment, you need to make an important phone call and don't want to move to a meeting room.

The high-sided version of Soft Shelter provides you with a comfortable, quiet place to make your calls, where you won't distract nearby colleagues.

For more relaxed meetings, you and your team members can get together in comfort and if you need to use your laptops, just move 'Slide' or 'Drift' into place. Not only will you have a more ergonomic working position, but the integrated power in Soft Shelter means you won't lose your work.

Key Features & Benefits

Modular design allows for easy configuration and practicality

High, medium or low seat backs

Single chair or sofa style configurations

Can be arranged in rectangular or circular settings

Acoustic panels for noise damping

'PowerCube' option connects to a floorbox so you can charge laptops, phones and other peripherals.

** Available October 2010*

Finishes

The upholstery and rear panel can be upholstered in a wide range of fabric designs.

Soft Shelter was designed by Johannes Torpe Studios (JTS) in collaboration with Haworth Asia Pacific.

JTS is an internationally oriented design studio, producing work for clients across Europe and Asia. It is a creative melting pot representing a design/musical crossover.

They have developed a tangible and intangible idiom – a language of creative simplicity expressed in cutting-edge designs and award winning performances.

Johannes Torpe

Using a few simple pieces,
Soft Shelter can be configured
to suit your needs, and
reconfigured to adapt as you
change and grow.
