

NC-B Resonate®

by Haworth

Nicolai Czumaj-Bront | 2008

NC-B Resonate offers a fresh vision of sculpted storage and space division for reading areas, executive offices, and enclaves. Each shelf has a bent-plywood "wave," which creates surfaces and spaces for display. Three wave patterns are offered, and shelves can be mixed or matched to make different wave configurations. Plus, there is no designated top or bottom, so a host of inventive design expressions is possible.
