

Jump[®]

Height-Adjustable Tables

Jump height-adjustable tables foster well-being in the workplace by empowering people to choose the most comfortable posture for the task at hand. With such a broad array of choices, it's easy to enable collaborative interaction or heads-down focused work—and support the variety of postures required by people's diverse workstyle needs.

HAWORTH[®]

Smooth Operation

With the touch of a button, two powerful UL-approved motors raise the Jump table top at a brisk 1.5 inches per second. Dual columns are controlled by solid-state motors to ensure a gentle start and stop. The two base columns stay perfectly synched as they travel up and down.

Features

Jump tables allow for easy adaptability to change from one position to another when needed. With no exposed screws, hardware, or motors, they create an elegant presence wherever they're used.

Single-stage tables – Offer a height range of 27" – 46" to accommodate a range of body types; tops support up to 350 lbs.

Dual-stage tables – Offer a height range of 23.7" – 50.7" to accommodate a range of body types; tops support up to 350 lbs.

Programmable switch option – Provides four user-programmable height settings for easy adjustability.

Eight top shapes (up to 82" long), and two edge options (edgeband and knife edge) – Create a breadth of application variety through an easy and simple ordering system.

Premium anodized-aluminum frame – Will never corrode, flake, or peel.

Steel brackets – Attach to the frame with torque screws, providing strength and durability.

Locking and non-locking caster option – Enable easy space reconfiguration.

Optional workspace mounted screens – Create visual privacy for focus.

Optional wire management basket – Keeps wires organized and tidy in height-adjustable table applications.

Colors, Materials, Finishes

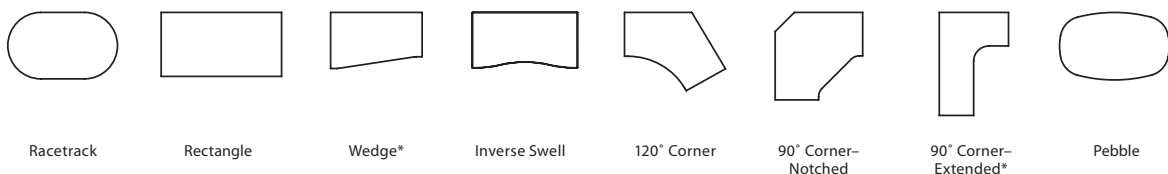

Jump worksurfaces are available in standard Haworth finishes, including laminates and veneers.
