

Compose® Connections™

PRODUCT SHEET

HAWORTH®

The Compose Connections spine-based system efficiently enables change, choice, and user control in dynamic, open-plan environments. It provides a robust utility infrastructure with power and data access that is decoupled from adjacent furniture, allowing an exceptionally flexible, light-scale solution. It also accepts fixed components of the Compose panel-based system, expanding the application range of the product line. In addition, Compose Connections supports Haworth storage and organizational components that also divide space.

Enable change, choice, and user control in dynamic, open-plan environments.

Enhances workspace adaptability

Freestanding tables and desks can be arranged as needed in conjunction with the Compose Connections spine. It provides easy access to power and data that doesn't hinder design freedom or reconfiguration. This is especially critical for the convenient placement and operation of height-adjustable tables. Worksurfaces, screens, and storage components can attach to the spine. In addition, Compose customers can make a transition from a traditional panel environment to a more open and collaborative one.

A family of integrated products

Compose Connections combines and connects with other products in Haworth's Integrated Palette™ to suit preferences in individual, collaborative, and touchdown spaces. The spine also supports modular and off-modular attachment of Haworth worksurfaces, Active Components™, X Series® storage components, and Belong™ accessories.

Versatility in design

Compose Connections combines the power and data management of a panel system with a minimalist, light-scale aesthetic. It allows designers to plan like a system application, but with the flexibility and openness of desking. The spine is raised off the floor for enhanced air flow and a more progressive look. Spine segments can be arranged in a straight line or configured to suit the need. The spine's low-profile feet offer the freedom to position freestanding tables where they are needed most.

Product details:

Product Dimensions

- Overall Height: 27"
- Overall Width: 24"–72"

Frame Dimensions

- Height: 16"
- Width: 24"–72"
- Profile: 3"

Tile Dimensions

- Height: 8", 16", 24"
- Width: 24"–72"

Tile Options

- Fabric
- Laminate
- Steel
- Wood

Low Profile Foot

- Length: 20"
- Width: 3"
- Height: 8"
- Overall Height: 26"

Connection Blocks

- 90°, 120°, and 180° configurations

Functional Rail

Off-Modular Attachments

- Worksurface
- Upper storage
- Screens/Tools

Functional Rail Dimensions

- Height: 1.5"
- Width: 24" and 72"
