

# Patterns™

## Product Sheet

2006 NeoCon Silver

A conscious break from standard solutions, Patterns redefines the way people experience an interior and returns design to the designer.

Based on an instinctively familiar form, Patterns elevates a simple folded plane to sophisticated design. With its broad material options and an anodized aluminum inlay, Patterns injects a level of refinement. From sleek, low benches and clean studio desking to architecturally intriguing workwalls and portals, Patterns offers a new dimension to the floorplate. Use Patterns to create unique interiors and eliminate the sea of sameness.

Studio & Partners of Milan and Haworth Design Studio created Patterns to work in concert with the Compose® open plan system, Enclose® moveable walls and the Planes® Collection. Creating adaptable and integrated environments has never been easier.

# Elements of Patterns

## Studio Table & Desking

- Specifications:
- 30" & 63" Depth
  - 29" Height
  - 72", 96", 120", 147", 195", 243" Widths
  - Power and Data optional

## Architectural Workwall

- Specifications:
- 22" & 42" Depth
  - 72", 96", 120" Widths
  - 76.5", 92.5" Height
  - Portal (92.5" Height only)
  - Power and Data optional

## Systems Workwall

- Specifications:
- 22" & 42" Depth
  - 72", 96", 120" Widths
  - 44.5" & 60.5" Height
  - Reference Return/Top (44.5" High only)
  - Power and Data optional

## Bench

- Specifications:
- 22" & 30" Depth
  - 17.5" Height
  - 72", 96", 120" Widths
  - Power and Data optional

## File Enclosure

- Specifications:
- 22" & 42" Depth
  - 30.5", 42.5", 54.5", 66.5" High
  - Fits 30", 36", & 42" Wide files
  - Power and Data optional
  - Reference Return/Top optional (30.5" or 42.5" High)

## A Balanced Floorplate

Patterns reconciles the tradeoffs between the efficiencies of open plan and the effectiveness of private offices, bringing balance to the floorplate.

Patterns offers meaningful elements that can be applied as a system within the open plan, freestanding furniture within offices, or architecture throughout the floorplate. The elements may also be applied minimally for punctuation, holistically to achieve rhythm and cadence, or used to delineate space and provide containment with file enclosures and workwall portals.

All Patterns elements are available with tailored specifications up to 1/8" on width and height.

# Patterns

## Architectural

Patterns elements can echo the scale of architecture and introduce a new dimension of mass and volume within the landscape. Establishing order throughout the floorplate, Patterns brings a visual logic to space while simultaneously smoothing the transition from private offices to open plan. As a result, Patterns makes it easy to develop strong visual relationships and striking spatial compositions throughout an interior.

## Redefining

Applied minimally for punctuation or used to achieve rhythm throughout, each Patterns element helps redefine the floorplate. The Systems Workwall creates visual order by naturally supporting and defining work areas. File Enclosures delineate groups while supporting storage needs. Architectural Workwalls provide a sense of enclosure — inherently communicating degrees of status while establishing a sense of permanence.

## Integration

Patterns integrates with the surrounding interior landscape, easing the visual gap that often occurs between architecture and furniture. This relationship is even more powerful when Patterns is used in combination with the Compose system, Enclose walls, and Planes tables. This intelligent integration is achieved through shared design, research, technology, and material strategy — resulting in products that are great alone, but even better when used together.
