

Tate Color

Cappellini | Jasper Morrison | 2012 | Imported from Italy or Made in the United States

Features and Specifications

Stacking Side Chair (Laminate Seat)

The seat is comprised of beech plywood with a laminate finish and exposed plywood edge. The four leg base is made of iron rod which is painted Matte Anthracite (6R-48) or Matte White (6R-1). The glides and spacers beneath the seat are made of polypropylene. A base in Matte Anthracite (6R-48) will have black glides and spacers, while a base in Matte White (6R-1) will have white glides and spacers.

Stacking Side Chair and Stools (Painted Wood Seat)

The seat is comprised of beech plywood with an aniline finishing in various colors. The four leg base is made iron rod which is painted in a matte finish to match the color of the seat, or satined stainless steel. The glides and spacers beneath the seat are made of grey polypropylene.

Trolley Cart

The trolley cart is comprised of metal, finished in a black paint color. It allows up to eight chairs to be stacked. Four casters allow the cart to be moved easily, and the front two casters can be locked.

Additional Notes

Tate Color side chairs can stack eight high. The stools cannot be stacked.

Matching bases, while in coordinating finishes, are not intended to be an exact match to the seat. Seats specified in Natural (FH-124) with matching base will have a white base.

Tate Color side chairs with laminate seats are made in the United States. All other models are imported from Italy.
